

SAGAR RAWAT

Gopeshwar, Uttarakhand

☎ +91-9411379979 ✉ sagarrawatinvincible@gmail.com [linkedin.com/in/sagar-rawat-8081ab24a](https://www.linkedin.com/in/sagar-rawat-8081ab24a) github.com/SagarRawat522 

Career Objective

To leverage my software development and analytical skills in delivering enterprise IT solutions, connected platforms, and digital transformation initiatives, while contributing to Hyundai AutoEver's mission of driving innovation in the automotive and mobility ecosystem.

Education

Chandigarh University

B.Tech in Computer Science

2022 – Present

Expected Graduation: 2026

Peace Public School, Gopeshwar

12th Grade, Science Stream

2020 – 2022

Christ Academy, Gopeshwar

10th Grade

2014 – 2020

Projects

Stock Market Pattern Analyzer | *Python, Pandas, Yahoo Finance API*

March 2024

- Designed an analytics system to process and visualize time-series data with multiple indicators.
- Implemented modular code for detecting patterns and forecasting — adaptable for business decision systems.

Credit Card Fraud Detection | *Python, AI/ML, Scikit-learn*

February 2024

- Applied ML classification models (Logistic Regression, Random Forest) for anomaly detection.
- Achieved 95%+ accuracy through preprocessing, cross-validation, and ROC analysis.
- Demonstrated scalable AI solutions relevant to enterprise IT and security.

Event-Driven Spiking Neural Network Simulator | *Python, NumPy, Matplotlib*

July 2024

- Developed a research prototype simulating spiking neurons for event-driven communication in neural systems.
- Implemented leaky integrate-and-fire neuron model with synaptic weight updates for adaptive learning.
- Visualized spiking activity and analyzed potential applications in neuromorphic computing.

Smart Inventory Management System | *Java, MySQL, JDBC, Swing*

January 2024

- Built a full-stack desktop application for managing stock, purchase orders, and sales records.
- Integrated MySQL database with Java (JDBC) for real-time inventory tracking and reporting.
- Implemented user authentication, role-based access, and interactive UI using Java Swing.

Research Publications

Enhancing Textual Understanding in ChatGPT

2025

Scopus Indexed – ACT 2025

- Explored methods to improve coherence and memory in multi-turn conversations with large language models.
- Presented at Advances in Computing, Control, and Telecommunication Technologies (ACT 2025).

Event-Driven Spiking Neural Networks on Analog–Mixed–Signal Neuromorphic Hardware

2025

Lect. Notes in Networks and Systems (Springer), SCIS-2025

- Designed an event-driven SNN model optimized for real-time processing on low-power neuromorphic hardware.
- Integrated analog-mixed-signal design principles for efficient spike-based computation.
- Focused on applications in traffic signal optimization and edge AI systems.

Technical Skills

Languages: Python, Java, SQL, C, HTML/CSS, JavaScript

Tools: GitHub, VS Code, Excel, Jupyter Notebook, Android Studio

Platforms: Linux, GCP (basic), WordPress, Jenkins

Leadership / Extracurricular

ISTE – Indian Society for Technical Education

Oct 2024 – Present

Technical Team Member

Chandigarh University

- Organized coding contests, tech talks, and hands-on workshops on software development and AI applications.
- Collaborated in managing technical infrastructure for hackathons and IT innovation events.
